

Freshpaint's Conversion Rate Optimization

Understand what's broken. Fix it faster. Convert more visitors.

Conversion Rate Optimization (CRO) is not a single product. It's an outcome. Freshpaint delivers CRO by combining analytics, funnels, heatmaps, session replay, surveys, and AI into a single, HIPAA-compliant platform.

Gain Visibility

Measure Marketing Performance

Connect The Dots Across The Journey

FLYING BLIND BETWEEN CLICK AND CONVERSION

Significant investment goes into driving traffic, but there's limited visibility into what happens between the click and conversion.

- Limited visibility into where users drop off
- No clear understanding of what's broken or why
- Fragmented tools that require manual analysis
- Privacy constraints that block insight into key flows

More time is spent analyzing data than improving performance, making it harder to know where to focus.

THE FRESHPAINT APPROACH

Freshpaint captures the full mid-funnel journey and uses AI to turn raw data into clear direction.

- See the full journey across behavior and feedback
- Pinpoint where users drop off and what's causing friction
- Prioritize fixes based on impact to conversion

Less time analyzing data. More time improving the experience.

HOW IT WORKS

Freshpaint connects every part of the CRO workflow into a single, unified system.

Analytics and funnels give a clear understanding of what's happening

Heatmaps and session replay reveal how visitors experience key journeys

Surveys explain why users don't convert

Freshpaint AI shows where to focus and what to fix

No need to stitch together tools or dig through data. Just a clear understanding of where to focus and what to improve.

Key Capabilities

FRESHPAINT AI

Know what to focus on instantly

Ask questions in plain language and get answers, explanations, and next steps without digging through dashboards.

HEATMAPS

See what gets attention and what gets ignored

Visualize clicks, scroll depth, and engagement to understand how visitors interact with your pages.

SESSION REPLAY

Watch where the experience breaks

Replay real sessions to uncover friction, confusion, and usability issues in context.

WEB ANALYTICS

Understand what's happening across your site

HIPAA-safe analytics show traffic, engagement, and conversion across key journeys.

FUNNELS

See exactly where conversion breaks

Track step-by-step flows and identify the highest-impact drop off points.

SURVEYS

Understand why visitors don't convert

Capture feedback at key moments to uncover what's blocking users and why they drop off.

WHAT THIS UNLOCKS

- Convert more of your existing traffic into patients, members, and customers
- Eliminate hours of manual analysis and report digging
- Focus on the highest-impact opportunities
- Replace multiple disconnected tools with one platform
- Improve conversion without increasing spend

THE CLEAR CHOICE

Freshpaint is purpose-built for healthcare CRO, not adapted from generic analytics tools.

- Built for HIPAA and healthcare privacy from the start, including PHI-heavy journeys
- Provides a complete view of how visitors move through your site
- Connects behavior and feedback in one platform
- Shows what's driving friction and where to focus, without manual analysis

Freshpaint delivers more than data. It provides clear direction on how to improve conversion.
